## BUFFET

Get inspired by completed solutions.  
Discover which inspiration you can find for yourself.

1. **Illuminated niches for plates** allow gaining additional storage space. The buffet, even without plates, looks interesting and the illuminated niches are aesthetically pleasing - whether left empty or filled.
2. **S/s plinths** correspond with the s/s worktop / top, it is also a practical and hygienic solution.
3. Drop-in equipment built in the worktop.
4. The buffet precisely integrated with the structural elements of the room - rectangular pillars.
5. **S/s worktop** is one of available solutions. It is less often used than, for example granite, but in this case it is perfectly coordinated with the interior design of the room. **Rounded corners** are aesthetic as well as practical details.
